READABILITY INDICES

Flesch Kincaid Reading Ease

30

Flesch Kincaid Grade Level

15.3

Gunning Fog Score	17	
SMOG Index	13.8	
Coleman Liau Index	15.1	
Automated Readability Index	15.7	
TEXT STATISTICS		
No. of sentences	520	
No. of words	12930	
No. of complex words	2987	
Percent of complex words	23.10%	
Average words per sentence	24.87	
Average syllables per word	1.79	

What do these results mean?

The indicator bars give a visual guide for the readability of the text. Red is a low readability score. Green is easily readable.

Flesch Kincaid Reading Ease

Based on a 0-100 scale. A high score means the text is easier to read. Low scores suggest the text is complicated to understand.

$$206.835 - 1.015 \times (\text{words/sentences}) - 84.6 \times (\text{syllables/words})$$

A value between 60 and 80 should be easy for a 12 to 15 year old to understand.

Grade Level indicators

These equate the readability of the text to the US schools grade level system.

Flesch Kincaid Grade Level

$$0.39 \times (\text{words/sentences}) + 11.8 \times (\text{syllables/words}) - 15.59$$

Gunning Fog Score

$$0.4 \times ((\text{words/sentences}) + 100 \times (\text{complexWords/words}))$$

SMOG Index

$$1.0430 \times \sqrt{30 \times \text{complexWords/sentences}} + 3.1291$$

Coleman Liau Index

$$5.89 \times (\text{characters/words}) - 0.3 \times (\text{sentences/words}) - 15.8$$

Automated Readability Index (ARI)

$4.71 \times (\text{characters/words}) + 0.5 \times (\text{words/sentences}) - 21.43$

Coleman Liau and ARI rely on counting characters, words and sentence. The other indices consider number of syllables and complex words (polysyllabics - with 3 or more syllables) too. Opinions vary on which type are the most accurate. It is more difficult to automate the counting of syllable as the English language does not comply to strict standards!
